Professional Summary

Mid-Senior Full-Stack Developer with over 5 years of experience engineering high-performance web applications and modernizing legacy systems. Specializing in headless CMS architectures (Drupal + React) and REST API development, with a strong focus on rigorous requirement analysis to translate complex business needs into scalable system architectures. Proven track record of reducing infrastructure costs, optimizing backend performance, and ensuring stable, multi-environment deployments while bridging the gap between technical and non-technical stakeholders.

Work Experience

Specialized Drupal Consultant (Short-term Project) 02/2026 - 04/2026

CyS Informática | Remote | Contract

Contributed to Drupal 10 projects through configuration-driven delivery, supporting secure content management, API integrations, and stable multi-environment releases.

- Architected and stabilized Drupal 10 content governance by implementing role-based access control (RBAC), ensuring strict business rule alignment across development, staging, and production environments.
- Engineered seamless JSON:API integrations and complex publishing workflows to secure unpublished content and improve data integrity.
- Resolved critical configuration drift and dependency conflicts by standardizing environment management via Composer, DDEV, and Drush, ensuring deployment reliability.
- Enhanced platform maintainability by auditing and refactoring custom and contributed Drupal modules, significantly reducing technical debt.

Full-Stack Developer (Drupal + React) 2023 - 2026

Activarte | Remote

Architected a Drupal-to-headless CMS transformation using React, REST APIs, and OAuth2, delivering a secure, scalable full-stack application.

- Led the transformation of a monolithic CMS into a high-performance headless architecture using React, REST APIs, and OAuth2, resulting in a 30% reduction in load times and a 40% decrease in infrastructure costs.
- Developed and optimized high-frequency REST endpoints and secure OAuth2 authentication flows, ensuring robust data security and efficient front-end/back-end communication.
- Delivered dynamic, performant user interfaces by building custom React components that consumed complex JSON:API payloads.

- Accelerated development cycles by managing Agile sprints in Jira and collaborating via cross-functional code reviews on Bitbucket.
- Provided technical guidance and mentorship to team members, streamlining collaboration and ensuring high-quality code standards across the development lifecycle.

Drupal/Moodle Developer | Part-time 2021 - Present

UADER - Rectorado | In-office

Directed university web projects with Drupal and Moodle REST APIs, delivering platforms that improved student services and streamlined administrative workflows. Acted as the primary liaison between academic, administrative, and governmental stakeholders, gathering requirements and translating them into technical solutions.

- Directed end-to-end development for three mission-critical university web portals, scaling infrastructure to support 57,000+ active users and processing 786,000+ events with high availability and optimal load times.
- Automated high-volume administrative workflows using ECA and custom Drupal modules, reducing manual operational tasks by 80% and minimizing human error.
- Stabilized core infrastructure, resolving recurring software bottlenecks and reducing system downtime by 25% through proactive debugging and server optimization.
- Engineered and launched an automated course subscription platform utilizing Moodle REST APIs, successfully processing 1,100+ new enrollments in its first month.
- Led technical mentorship and training initiatives, guiding team members on Drupal best practices and project lifecycle management to elevate overall team performance.

Core Skills

Languages & Frameworks: React.js, PHP, JavaScript (ES6+), Java, Symfony, jQuery, Bootstrap, Sass, HTML5, CSS3, SQL

CMS & Ecosystem: Drupal 9/10/11 (Theming, Custom Modules, Hooks, Entity API, Configuration Management, Commerce, ECA), Moodle

Web Development & Performance: RESTful APIs, JSON:API, OAuth2, Web Optimization, Debugging (Xdebug, Chrome DevTools)

Databases & Tools: MySQL, PostgreSQL, CI/CD, Pantheon, Composer, DDEV, Drush, Git (GitHub, GitLab, Bitbucket), VPN, SSH, Docker, Kubernetes, AWS

Security & Methodologies: OWASP Principles, Secure Authentication, Agile (Scrum, Kanban), Jira

Education

Autonomous University of Entre Ríos Graduated: 2025

Associate Degree: Information Systems

Minors: Information Systems Analyst

Centenario High School 2011 - 2015

High School Diploma: Economics

Minors: Economics and Administration

Languages

Spanish (Native), English (Fluent / Professional Working Proficiency)

Certificates

Diploma in DevOps Engineering

Apr 2025
